

## FUSION CLIENT

### CODE:

CS108

### DESCRIPTION:

This course covers the concepts and techniques required to transfer data objects between Fusion databases using the Fusion Client application. This course also provides instruction on administering data objects in the Fusion databases.

### COURSE TOPICS:

- Understanding the Fusion Client interface.
- Transferring data between different Fusion databases.
- Administering data object status and version information.
- Authorizing drill hole objects in the Fusion databases.
- Reporting and exporting using Fusion Client.

### DURATION:

0.5 Days

### LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Successfully transfer data objects between Fusion databases.
- Properly administer data object status and version as required.
- “Lock” drill hole objects in the database using Drill Hole Authorization.
- Produce reports.
- Export data.

### PREREQUISITES:

CS101 – Fusion Concepts

### WHO SHOULD ATTEND?

This training course is designed for any users and/or database administrators who will be responsible for transferring data between different Fusion databases, administering data objects, or authorizing drill hole objects in the Fusion databases.
