

## QUERYBUILDER 1

### CODE:

CS109

### DESCRIPTION:

This course covers the concepts and techniques required to create and execute basic queries against the Fusion data model using the QueryBuilder application.

### COURSE TOPICS:

- Understanding the Fusion data model
- Understanding the QueryBuilder interface
- Designing queries
- Viewing results
- Exporting data

### DURATION:

0.5 Days

### LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Identify the tables in the database that they require to work with their data
- Design basic queries to access their information
- Sort and filter the data that is returned from the query
- Export the query results to an external source

### PREREQUISITES:

CS101 – Fusion Concepts

### WHO SHOULD ATTEND?

This training course is designed for any users and/or database administrators who require the ability to query the Fusion data model either using the QueryBuilder application or through external sources such as 3<sup>rd</sup> party ODBC interfaces.
