

DHLOGGER ADMINISTRATION - 2

CODE:

CS202

DESCRIPTION:

This course covers the concepts and techniques required to administer the value-add components in the Fusion Solution including sample dispatch, drill costing, coordinate conversion, and email administration.

COURSE TOPICS:

- Configuring the database to accommodate sample dispatch.
- Configuring the database to accommodate drill costs.
- Managing coordinate conversion.
- Managing automatic email notification.
- Managing user profiles using the business administrator.

DURATION:

0.5 Days

LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Configure and implement the sample dispatch module in the system.
- Configure and implement the drill costing module in the system.
- Manage automatic email notification events.
- Define coordinate conversions between grid systems.
- Manage user profiles using the business administrator.

PREREQUISITES:

CS101 – Fusion Concepts
CS102 – DHLogger 1
CS103 – DHLogger 2
CS201 – DHLogger Administration 1

WHO SHOULD ATTEND?

This training course is designed for database administrators who are responsible for managing the Fusion database and would like to maximize the value that they are getting out of the Fusion solution.
