

FUSION IT

CODE:

CS209

DESCRIPTION:

This course covers the concepts and techniques required to implement and manage the Fusion solution at an IT level. This course addresses approaches to installing, upgrading, and troubleshooting IT-related issues, along with providing strategies for properly backing up the data in the system.

COURSE TOPICS:

- Understanding versioning and database upgrades.
- Installation procedures and strategies.
- Upgrading existing installations.
- Troubleshooting installation and upgrade issues.
- Ensuring business continuity through the management of database backups.
- Proper execution of SQL scripts provided by Century Systems.

DURATION:

0.5 Days

LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Install the Fusion software.
- Upgrade existing installations at their site.
- Troubleshoot any issues with the installation or upgrade.
- Properly manage database backups.
- Properly execute SQL maintenance scripts.

PREREQUISITES:

CS101 – Fusion Concepts

WHO SHOULD ATTEND?

This training course is designed for any database administrators or IT professionals who are responsible for managing software and/or databases at their site.
