

DATA MIGRATION CONCEPTS

CODE:

CS304

DESCRIPTION:

This course covers various concepts and techniques involved in migrating data from external systems into the Fusion database.

COURSE TOPICS:

- Analysis and preparation of external data sets.
- Data conversion strategies.
- Mapping to the Fusion data model.
- Troubleshooting import issues.

DURATION:

0.5 Days

LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Properly analyze external data sets and determine what preparations are required for import.
- Identify conversion parameters required for external dataset tables and columns.
- Properly define import mappings into the Fusion data model.
- Properly identify and resolve any validation issues identified during the migration process.

PREREQUISITES:

CS101 – Fusion Concepts
CS102 – DHLogger 1
CS201 – DHLogger Administration 1

WHO SHOULD ATTEND?

This training course is designed for system users and/or database administrators who are responsible for incorporating historical or newly-acquired data sets into their database.
