

DATA VALIDATION CONCEPTS

CODE:

CS305

DESCRIPTION:

This course covers various concepts and techniques involved in validating data in a Fusion database, based on client-specific requirements.

COURSE TOPICS:

- Understanding data validation within the Fusion solution.
- Defining validation requirements.
- Preparing validation components.
- Incorporating validation components into standardized reports.
- Automation of data validation.

DURATION:

1.0 Days

LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Understand the different types of validation that are available within the Fusion solution.
- Identify validation requirements for a specific project or site.
- Organize validation components for incorporation into validation reports.
- Discuss strategies for automating the data validation process.

PREREQUISITES:

CS101 – Fusion Concepts

CS109 – QueryBuilder 1

CS110 – QueryBuilder 2

WHO SHOULD ATTEND?

This training course is designed for system users and/or database administrators who are responsible for validating data in a Fusion database.
