

## FUSION DATA VALIDATION AND REPORTING

### CODE:

CS905

### DESCRIPTION:

This training program provides all of the information that you need in order to be able to thoroughly validate your Fusion database and easily report the results to the appropriate people in your organization.

### PROGRAM COURSES

- CS305 – Data Validation Concepts
- CS110 – QueryBuilder 2: Advanced Querying Techniques
- CS111 – QueryBuilder 3: Validation Techniques
- CS306 – Crystal Reports and the Fusion Database

### DURATION:

5.0 Days

### LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Understand the different types of validation that are available within the Fusion solution.
- Identify validation requirements for a specific project or site.
- Create complex queries using various table joins, and SQL functions.
- Create database views to simplify the execution of complex queries on a regular basis.
- Create validation queries for data on a drill hole, project, site, and/or enterprise level.
- Create, edit, and deploy validation reports for user groups at all levels of an organization.
- Automate the validation process for their users, site, and/or company.

### WHO SHOULD ATTEND?

This training course is designed for system users and/or database administrators who are responsible for validating the data in a Fusion database.
