Fusion6 General Release

Century Systems is pleased to announce the release of the latest version of our Geo Data Collection and Management Solution, *Fusion6*. *Fusion6* builds upon an already solid foundation of solutions that enhance our clients' accuracy and efficiency. With new features, enhancements and usability, *Fusion6* will continue to assist our clients in becoming more streamlined and competitive. For more information on *Fusion6* contact sales@centurysystems.net.

FUSION6

CENTURY Systems
TECHNOLOGIES INC

Enhanced Functionality, Useability, Productivity

Multilingual Support

Fusion6 now has the ability to switch languages on the fly. Languages currently available include English, Spanish, and Russian with more to come!

New Product—Crystal Viewer

Designed to take advantage of Crystal Reports, an industry standard reporting software, Crystal Viewer gives users more reporting power and the ability to produce and customize their own reports

Enhanced Logging Styles

Fusion6 allows administrators to further define logging styles by giving them the ability to map individual table columns to their associated Logging Style

Enhanced Auditing

Fusion6 has had additional fields added to the database to further simplify the audit process when using DHLogger

Additional Database/OS Support

Oracle 11G and SQL Server 2008 database platforms are now supported within Fusion6. Support has also been added for Windows 64-bit Operating Systems

Final Depth Validation

Fusion6 will now allow users to validate the final depth of the hole. Users will receive a visual cue and further logging incidents will be recorded if logging continues past the end of hole.

FUSION6

Selective Checkout

Fusion6 allows clients to streamline their workflow by allowing multiple users to log different aspects of the same drillhole simultaneously while using the all new Selective Checkout feature

This feature also enhances security by limiting who can edit individual tables

Solutions for all of your Geo Data Management Needs
